# Campaign to support the St John of God Hospital in Batibo

The Brothers of St John of God urgently need help to keep their hospital open in Batibo which, after four years of armed conflict, is the only one left to serve the population in that area.

Despite all the insecurity and looting it has suffered, in 2020 this centre provided 13,640 services in various health areas such as mother-child and primary care, in-patient care, traumatology and the diagnosis and treatment of infectious diseases.

We are therefore asking for your cooperation to enable us to continue assisting the people suffering from this conflict, ignored by the international community, and ensure that thousands of people are not left totally unattended and forgotten.

**If we can raise 300,000 euros, the Hospitaller Order will be able to ensure that the Centre will remain sustainable for the next 4 years.**

**Every donation will be sent directly to Batibo, and will help to save many lives.**
