

Project: Primary mental health care centre

To create a primary mental health care centre in the region of Kolda, southern Sénégal, whose population lives mainly from livestock farming and agriculture. There are no mental health resources in this area. People and their families must travel hundreds of kilometres to receive medical care and treatment in this speciality.

Faced with this situation and the growing demand for mental health care, the Hospitaller Order of St. John of God in Sénégal is planning to build a primary health care centre, with a budget of 303,250 euros, which we hope to obtain with your generosity through this campaign.

Collaborate with us.

There can be no health without mental health.
